

Coppin State University

Dear Coppin Family,

We are very happy to announce that the **Campus Analytic Dashboard is now available!** With a click of a button, Coppin faculty and staff will have access to the same data at the same time, creating a campus-wide culture of transparency and openness.

The data unveils a great story about Coppin, including:

- Number of applicants;
- Demographics of applicants;
- Enrollment trends; and
- Class and building utilization.

With this data, the entire campus can focus on our ultimate goal of student success by making informed, data-driven decisions. Equally important, the entire campus will be empowered by being knowledgeable of the trends here at Coppin.

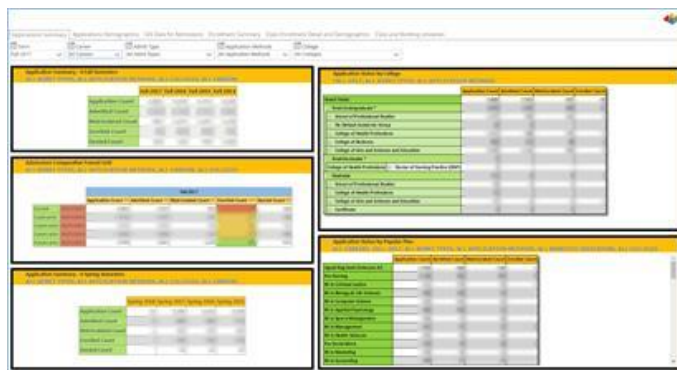

All of the data is in aggregate form, so you will not be able to see any identifiable student information (i.e., names, contact information, student identification number, etc.). **This data should not be shared with those outside of Coppin.** Requests for data needed for reporting purposes should be directed to the Office of Planning and Assessment or the appropriate administrative unit.

READY TO GET STARTED???

It's very simple to access the Campus Analytic Dashboard. Visit [EagleLINKS](#). On the EagleLINKS menu, click to expand the **Campus Systems** menu. Once expanded, click **Campus Dashboard (Campus Only)** to open the dashboard. Due to security purposes, you will only be able to access the dashboard on-campus.

Please see the step-by-step guide providing greater details about using the different screens of the dashboard. In the upcoming months will be hands-on sessions and recorded tutorials.

We look forward to the entire campus partaking in the Campus Analytic Dashboard! Please direct any question to the **I.T. Help Desk at 410-951-3888.**
